DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-7, 9-12, 15, 17-22, 24 and 27-34 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Haas '292.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8, 16, and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haas in view of Hansen.

Haas discloses in figures 1-10 a vibratory patient support system, substantially as claimed. However, Haas doesn't disclose the bladder being a wave bladder or the chamber having a finger design. Hansen teaches in figure 1 a vibratory patient support system comprising a wave generator (fig. 1) that is connected to a bladder (which makes the bladder a wave bladder). It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the wave bladder as taught by Hansen could be substituted for the bladder disclosed by Haas in order to apply

waves to the user's body. It is a design choice to form the chamber in the shape of a finger.

Allowable Subject Matter

Claims 13-14 and 25-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rhodes, Ruchl and Luff, each discloses a vibratory system.
